

Mini Workshop : Basic Syntax C++ Programming

Pre-Workshop Guide

October 2018

Contents

Introduction	3
Installation	4
System Verification	5

Introduction

This guide is a resource for member at Informatics Research Club to use in setting up their laptop or environment prior to the scheduled workshops.

In this guide, students can find a list of prerequisites that will be consistently used throughout the entire course.

These prerequisites are required to be completed before the start of the workshop.

For new students, we will run through the installation process to ensure that the necessary programming languages and tools - such as Code Block - are installed.

The next section will then talk about methods on how to verify whether the installs were completed successfully.

For recurring students, we recommend repeating the System Verification section once more to confirm past completed installations.

Installation

Installing Code Blocks

Use this link : <http://www.codeblocks.org/>

Note : Make sure the versions downloaded are compatible with your operating system!

System Verification

Verify Code Blocks Installation :

1. Open Code Blocks.
2. Click icon Build and Run Or Press F9 in Keyboard.
3. If the installation was completed successfully, there should be a response as shown below. In this case, it appears "Hello World!".

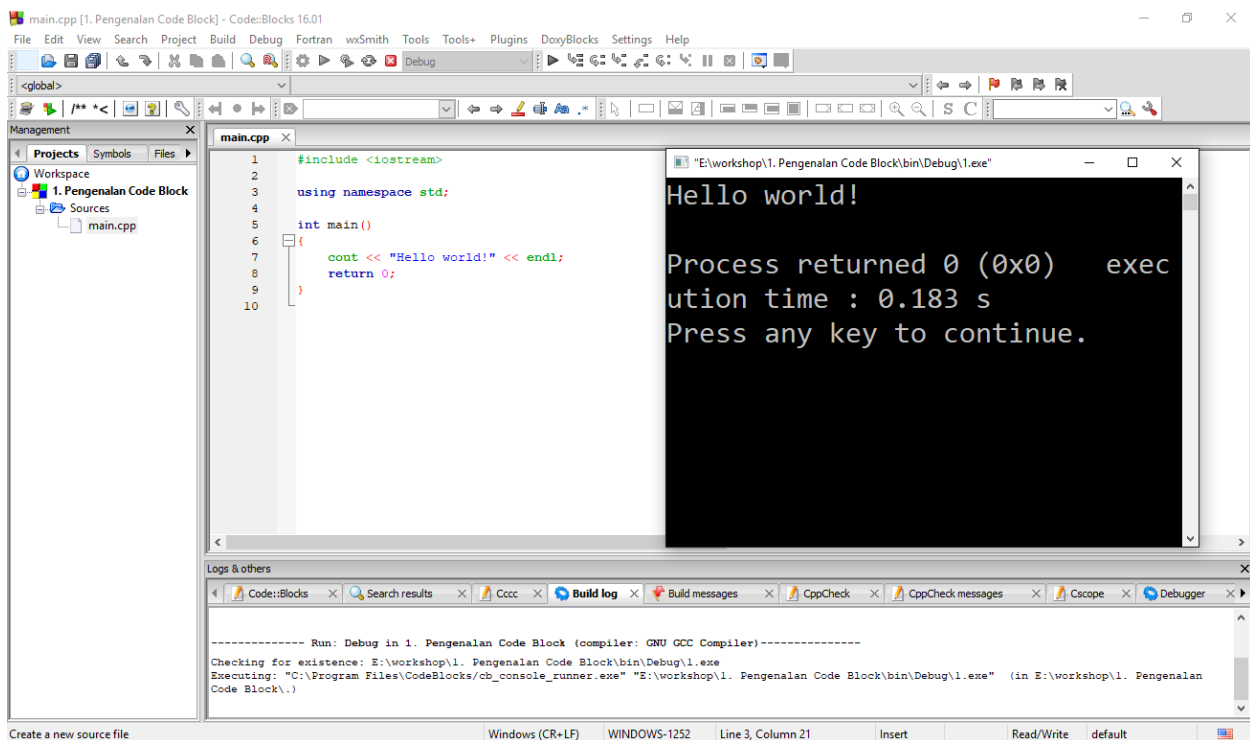

Figure 1: Response Code Blocks
